Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior arts of record do not show the electrically programmable three-dimensional integrated memory comprising a substrate circuit having an address-decoder and at least an electrically programmable three-dimensional memory being stacked on top of the substrate circuit and connected with the substrate circuit through a plurality of inter-level connecting vias in which the address-decoder decodes address for at least a portion of the three-dimensional memory level.

The prior arts of record do not show the electrically programmable player-on-a-chip comprising a substrate circuit having an embedded media player and at least an electrically programmable three-dimensional memory being stacked on top of the substrate circuit and connected with the substrate circuit through a plurality of inter-level connecting vias in which the embedded media player can process the multimedia contents stored in the three-dimensional memory level.

The prior arts of record do not show the electrically programmable computer-on-a-chip comprising a substrate circuit having an embedded processor and an embedded RAM and at least an electrically programmable three-dimensional memory being stacked on top of the substrate circuit and connected with the substrate circuit through a plurality of inter-level connecting vias in which the embedded RAM can store at least a portion of software code from the three-dimensional memory level and the embedded processor can process data and code stored in the embedded RAM.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
